Sure-Bra™ from Reliant

The Sure Thing in Lingerie Lamination

Revolutionary New Technology in Lingerie Manufacture

From Reliant
Economical Efficient Comfortable

Sure-Bra™ FROM RELIANT
The Sure Thing in Lingerie Lamination
Sure-Bra™
FROM RELIANT

A Complete Laminating & Adhesive Process System
For Guaranteed Results In Lingerie Production
The Sure-Bra™ Process

STAGE 1
Reliant 3 Stage Unwind

STAGE 2
Reliant Powder Coater

STAGE 3
Reliant High Level Unwind

STAGE 4
Reliant Coolstream Laminator

STAGE 5
Reliant Surface Rewind

Reliant Coolstream Sure-Bra™ Powder Lamination Production Line
(Can Be Used For Web & Film Adhesives)
The Sure-Bra™ Process Guarantees Wash Fast Results For The Lifetime Of The Garment

Sure-Bra™ FROM RELIANT
The Sure Thing in Lingerie Lamination
The Sure-Bra™ Adhesive Powder Creates A Cross-Linked Chemical Bond That Will Not Breakdown With Re-Heating Or Washing
With The Sure-Bra™ Process There Is No Danger Of The Bond Breaking Down After Lamination. When High Temperature Moulding The Bond Strength Is Enhanced
The Sure-Bra™ Process Gives The Ability to Easily Control the Fabric Handle Required

- Fabric
- Foam
- Fabric

- Soft ✓
- Firm ✓
- Breathable ✓
- Flexible ✓
- Stiff ✓
- Light ✓
- Heavy ✓
The Sure-Bra™ Process Ensures High Level and Adjustable Breath-Ability of Laminate Achievable by Simple Adjustment During Processing

Breath-Ability And Comfort
The Sure-Bra™ Process
Flexible Technology For Different Fabrics

Lace
Cotton
Polycotton
Polyester
Lycra
Lycra Mixes
Satin
Silk
The Sure-Bra™ Process is Completed During the Production Run With……

No Additional Curing Time Required Before the Moulding Process
The Sure-Bra™ Process Eliminates The Problem Of Yellowing Of Adhesives During and After Processing
The Sure-Bra™ Process Provides Clean, Dry and Safe Production Processing
Sure-Bra™ Production Flexibility

Continuous Reel-to-Reel Production

Or Cut Panel Production
The Sure-Bra™ Process Provides Very Controlled Production with the Ability to Stop Mid-Flow Without Problems, Reducing Wastage

Large & Small Reel-to-Reel Production Runs

Large & Small Sheet Fed Production Runs

Sure-Bra™ FROM RELIANT
The Sure Thing in Lingerie Lamination
The Sure-Bra™ Process Is Clean & Easy To Use With None of the Problems Associated with Controlling the Viscosity of Liquid Adhesives
The Sure-Bra™ Process Eliminates Fabric Damage And Rejects Caused By Uneven Distribution When Using Liquid Adhesives for Laminating

- Inadequate Bonding
- Strike-Through & Strike Back

Correct Bonding With Good Penetration & Dispersal Of Adhesive Easily Achievable On the Reliant Range
The Sure-Bra™ Powder Adhesive System Requires No Special Storage Conditions for Adhesives And Has No Shelf Life Problems
The Sure-Bra™ Process Uses Stepped Zone Heating from Both Sides of the Material for the Control and Elimination of Shrinkage & Distortion of the Fabrics
Using The Sure-Bra™ Process Provides Significant Payback By Guaranteeing the Lamination During Moulding and Eliminating Rejects Which Have a High Added Value Cost
The Sure-Bra™ Process Saves The Added Value Cost of Rejected Materials and Handling Due to Lamination Failures During Moulding and Washing

Fabric Adhesive Foam Adhesive Fabric + Handling Laminating Cutting Moulding = Saved Reject Costs
Using The Sure-Bra™ Process Achieves Savings on Rejected Fabric During Production Caused By Shrinkage, Distortion & Liquid Adhesives
Using The Sure-Bra™ Process Achieves Savings on The Cost Of Alternative Adhesives Such As Film & Web
Using The Sure-Bra™ Process Eliminates Wastage of Adhesives even when running Cut Pieces
Using The Sure-Bra™ Process Achieves Savings By Avoiding The Need For Clean Down Time When Starting-up Or Making Changeovers

Sure-Bra™ Savings

Time Wasted
